

MASTER'S THESIS IN PHYSICS

Development of an Interface between an SiPM-based Scintillation Detector and the CMS Drift Tube Read-Out System using the lpGBT ASIC

written by

Nils Jonathan Esper

presented to

The Faculty of Mathematics, Computer Science and Natural
Sciences of RWTH Aachen University

Institute of Physics IIIA

supervised by

Univ.-Prof. Dr. rer. nat. Alexander Schmidt

and as second reviewer

Univ.-Prof. Dr. rer. nat. Oliver Pooth

Aachen, December 2025

Abstract

Abstract.

1 Introduction

1.1 Standard model of particle physics

1.2 Cosmic particles

1.2.1 Cosmic radiation

1.2.2 Atmospheric creation of muons

1.3 Principles of particle detection

1.3.1 Interactions of particles and matter

1.3.2 Scintillators and silicium photomultipliers

1.3.3 Gaseous detectors

1.4 Modern read-out electronics

1.4.1 Requirements for detector read-out

1.4.2 FPGA devices

1.4.3 Basics of logic development

1.5 Idea for this work

1.5.1 Initial situation

1.5.2 Proposed combined read-out setup

2 CMS Drift Tube system

2.1 Compact Muon Solenoid experiment

2.1.1 Large Hadron Collider

2.1.2 Experimental setup

2.2 Drift Tube system

2.2.1 Subsystem setup

2.2.2 Detector impact and performance

2.3 Phase-2 DT read-out electronics

2.3.1 Motivation for upgrade

2.3.2 Phase-2 DT system overview

2.3.3 Minicrate electronics

2.4 Cosmic test stand in Aachen

3 SiPM-based scintillation detector

3.1 Detector setup

3.2 FPGA read-out system

3.2.1 Signal sampling with FPGA-internal comparators

3.2.2 Timestamp assignment

3.2.3 Online coincidence evaluation

3.2.4 Data funneling

3.3 Calibration procedures

3.3.1 Comparator threshold calibration

3.3.2 Intra-channel timing calibration

4 lpGBT detector interface

4.1 lpGBT ASIC

4.2 lpGBT Mezzanine PCB

4.3 Data interface to FPGA

5 Unified backend electronics

5.1 HTG-940 prototype backend

5.2 Backend firmware

5.2.1 Functionalities for OBDTs

5.2.2 Modifications to interface lpGBT Mezzanine

5.3 Data path to computer

6 Detector synchronization

6.1 Testpulse theta board

6.2 Synchronization with test pulses

7 First combined measurements

7.1 Cosmic muon coincidence

7.2 Recovering DT-specific distributions

8 Summary and outlook

Appendix

A Additional details
